When you try to select a level it scrolls down extremely slowly and it takes ages to get to the level i left on.

other than that a fun brain teaser game. Cubiques is a good little puzzler. It looks great and is engaging and has a great atmosphere. The game is challenging and has 70 levels to complete, each growing more complex as you progress. It performs well and has a good simple layout. Controls are simple and easy to use and the game itself has a minute footprint on your hard drive. Glad to see it has made the move over from mobile on to PC as well.. Fun, quite short, easy puzzles. The only complaint I have is that the spaces should be marked, so you can judge whether to go one way or another when looking at a large mass of same-colored spaces. Other than that, a fun little jaunt worth a couple bucks!. Learning curve was good. Fun puzzle game if you have a couple hours.
